

UMER KHAN

AI / ML Engineer · Full Stack Developer · LLM Integration · React & Node.js · Cloud & DevOps

umerkhn819@gmail.com · +92 318 1412819 · Islamabad, Pakistan · github.com/umerkhn819-alt · linkedin.com/in/muhammad-umerkhan-293922404 · portfolio-beryl-psi-19.vercel.app

PROFESSIONAL SUMMARY

Developer with a dual focus in AI/ML engineering and full-stack development — building intelligent systems end-to-end, from ML model training and LLM integration through to React frontends, REST API backends, and cloud-deployed infrastructure. Experienced with Scikit-learn, PyTorch, OpenAI API, LangChain, React.js, React Native, Node.js, FastAPI, PostgreSQL, MongoDB, Docker, and AWS. AWS Certified AI Practitioner. Currently pursuing a B.Sc. in Computer Science at Air University, Islamabad (2028).

TECHNICAL SKILLS

 AI / ML SKILLS	 FULL STACK SKILLS
ML / Data: Scikit-learn, PyTorch, NumPy, Pandas, Matplotlib LLMs & AI: OpenAI API, LangChain, LlamaIndex, RAG pipelines AI APIs: Prompt engineering, LLM feature integration Cloud AI: AWS Bedrock, AWS AI Practitioner certified	Frontend: React.js, React Native (Expo), TypeScript, Tailwind CSS Backend: Node.js, Express.js, FastAPI — REST APIs, JWT, WebSockets Databases: PostgreSQL, MongoDB — schema design, query optimisation DevOps: Docker & Compose, AWS (EC2, S3), GitHub Actions, CI/CD
Languages: Python · JavaScript / TypeScript · SQL Tools: Git / GitHub, Postman, Swagger / OpenAPI, Docker, Agile / Scrum	

PROJECTS

AI Fraud Detection & Analytics Platform [\[AI/ML\]](#) | *FastAPI · Scikit-learn · PyTorch · OpenAI API · LangChain · React · PostgreSQL · Docker*

 github.com/umerkhn819-alt

- Built an end-to-end ML pipeline to classify fraudulent financial transactions in real time — Scikit-learn models served via FastAPI prediction endpoints, results stored in PostgreSQL.
- Integrated OpenAI API and LangChain to generate natural-language explanations for each prediction, making ML outputs interpretable for non-technical users.
- Designed an interactive React analytics dashboard with data visualisation; containerised the full stack with Docker for reproducible deployment.

EastlyAI – Recipe Recommender & Cooking Assistant [\[Full Stack + AI\]](#) | *React Native (Expo) · Node.js · Express · MongoDB · TypeScript · OpenAI API · Spoonacular API · JWT*

 github.com/umerkhn819-alt

- Full-stack cross-platform mobile app (iOS & Android): React Native/Expo frontend, Node.js/Express REST API backend, MongoDB database — fully typed in TypeScript.
- Built JWT-secured authentication, admin content management panel, and real-time AI cooking assistant via OpenAI API; integrated Spoonacular API for live recipe search.
- Deployed backend to AWS with Docker containerisation and a CI/CD pipeline for consistent staging and production environments.

CERTIFICATIONS

◆ AWS Certified AI Practitioner

CLF-C01

◆ Generative AI on AWS Bedrock & RAG

EDUCATION

B.Sc. Computer Science · Air University, Islamabad

Expected Jan 2028

CGPA: 3.05 / 4.00 · Relevant Coursework: Machine Learning, Data Structures & Algorithms, Database Systems, Software Engineering

Open to AI/ML and Full Stack roles, internships, and contract work · Available immediately
